

AI Ops for SAP

Observe. Optimize. Innovate.

Manage SAP Ops and more,
anywhere it runs.

About Avantra

Avantra is the leading AIOps platform for SAP operations. Enterprises running Avantra transform how they manage SAP: reducing cost and risk, strengthening compliance, and unlocking valuable time for innovation. Founded in Switzerland in 2000, Avantra has grown into the global standard for SAP operations automation - trusted by enterprises and managed service providers alike to run the world's most complex SAP landscapes.

Today, Avantra unifies operations across on-premises, hyperscaler, and Cloud ERP, giving organizations the intelligence and automation to accelerate transformation projects, simplify ERP migrations, and deliver continuous business support - wherever SAP runs.

Observe. Optimize. Innovate.

SAP monitoring & basis automation anywhere SAP runs

Run SAP perfectly. Hybrid observability from a single point of control across on-premises, hyperscaler and Cloud ERP deployments. Support mixed environments of ECC, S/4HANA and BTP from a single pane of glass and without cumbersome mixed tooling integrations.

Solve Systems, Security and Financial Utilization monitoring operations with a single solution.

Optimize challenging and expensive SAP operations, including System Refresh, Landscape Management, HotNews, Security Notes and Patching. Robust automation eliminates human labor and repetitive activities across landscape systems.

Integrate with existing enterprise ITSM solutions, including ServiceNow.

Innovate with Cloud ERP migration, infrastructure management and AIOps for SAP, accelerating migration projects and automation non-value add management activities.

Avantra is a single solution for comprehensive SAP Operations, Observability and Automation.

Observe

SAP, anywhere it runs

Hybrid observability ensures operational insight anywhere SAP runs. AIOps automatically detects operational normals and manages systems, while unified visibility across all SAP services including Cloud BTP detects issues before they impact the business.

Scalable, policy-driven configuration reduces deployment and maintenance upkeep, making Avantra simple to install and productive to use.

Avantra customers enjoy a 95% reduction in unplanned SAP downtime using advanced observability and AIOps and reduce the cost of monitoring, often by 25% or more.

- Centralized SAP monitoring anywhere SAP runs – both HANA and legacy
- Single view and point of control across the entire SAP estate
- Customizable checks ensure compliance while preventing configuration change and drift
- Real-time alerts prevent downtime. ServiceNow Integration leverages existing IT processes
- Automation for repetitive tasks reduces low-value basis tasks
- Rapid deployment of new systems supports landscape growth and project systems easily

Our customers experience
system availability of 99.995%
thanks to Avantra.

Executive Director

Optimize

SAP operations, across the enterprise

With Avanza, SAP labor intensive and even error prone tasks become automated and consistent. Imagine touch-free System Refresh, fully automated Landscape management including backup, systems configuration or kernel upgrades, and completely automated HotNews.

SAP customers using Avanza eliminate costly and redundant IT tasks and refocus teams on innovation and transformation activities benefiting the business. 98% of Avanza customers observe faster update release cycles and average system refresh acceleration by 85%.

Increase the capacity of basis teams by 50% or more, creating essential capacity for the support of growth and transformation initiatives without additional staffing.

Automation extends across the SAP landscape and supports Ansible integration, furthering flexibility.

Automation in system monitoring drives better system health, better end user experience, and frees up time for innovation.

VP, Infrastructure and Operations

Scotts Miracle-Gro

Innovate

SAP adoption and technology

Cloud ERP and the advantages of scalable, elastic capacity using BTP create a new standard for competition. The race to effectively leverage these technologies for core business operations remains intense.

Avantra paves the road to Cloud enablement, making the incremental adoption of key new technologies predictable and managed, providing the observability of systems, cloud spend and compliance required for the successful adoption of Cloud ERP.

SAP customers using Solution Manager, Focused Run and Landscape Manager can safely replace all three with Avantra while simplifying the ultimate transition to Cloud ERP and Cloud ALM.

Avantra enabled €60M in cost avoidance through complete elimination of unplanned downtime and €400K in annual savings via reduced manual intervention.
