Google Cloud   AVANTRA

Avantra & Google Cloud

Empowering SAP operations teams with intelligent automation

Avantra is the industry-leading AIOps platform that simplifies SAP operations. Global enterprises and Managed Service Providers (MSPs) improve their business experience, performance, compliance, and re-focus valuable resources on digital transformation and reduce operational cost.

Automating and managing SAP on Google Cloud

Avantra delivers a unified platform, whether on-premises, in the cloud, SaaS, or hybrid for both Build and Run Operations using Avantra, SAPcentric business can easily migrate their workflow to Google Cloud, and ensure its performance, health and compliance across all landscapes.

Full-Stack Automation
Reduce Cost to Serve

Free up IT operational resources by automating best practice SAP management and enforcing compliance across the entire SAP stack. Reduce the amount of manual work required to manage complex SAP systems by empowering people to focus on quick identification and resolution of issues. Avantra specializes in automating repetitive activities like monitoring, reporting, audit, security, and updates.

Actionable Insights
Better Business Experience

Provide the insights that your team need to instantly use and act on through the detection of anomalies across complex SAP landscapes as well as cloud-based SaaS services. Its industry leading landscape insights integrate with a smart notification engine and ServiceNow for workflows to ensure the right person gets the right information at the right time.

Operational Transparency
Security, Compliance and Audit Readiness

Get complete transparency across your business landscape including security, auditing, issues and updates via notifications, dashboards and SLA reports. With completely customizable options in all of these areas, Avantra is designed to be business facing, technical team facing and auditor facing.

End-to-end intelligent IT operations with Avantra
